IT Acceptable Use and Information Security Policy

Policy IT-01 · Version 2026.3 · Effective 15 August 2026 · Owner: IT Security · Rahmqvist Group

TEST DOCUMENT
Fictional content created to test the Rahmqvist Assistant. It is not an actual Rahmqvist policy.

1. Purpose

This policy explains how to use company IT safely, so that client and company information stays protected. It applies to all employees, consultants and contractors who use Rahmqvist systems or devices.

2. Your account

- Multi-factor authentication (MFA) is required for every company system, from any location.
- Passwords must be at least 14 characters; a passphrase of four or more words is recommended.
- Never reuse your company password anywhere else. A password manager is provided for free.
- Passwords do not expire. Change yours at once if you suspect anyone else knows it.
- Never share your account, and never let anyone else approve an MFA prompt for you.

3. Devices

Company laptops are encrypted and managed by IT. The screen locks automatically after five (5) minutes without activity; lock it yourself whenever you step away. Install updates within seven (7) days of being prompted. Company devices are for you only and must not be used by family members or friends. You may read company email on a personal phone, but only through the company's managed apps.

4. Software and cloud services

Install software only from the self-service catalogue. To request something that is not there, raise a ticket with the IT Service Desk. Free trials of online services need IT's approval, because they often store data outside the EU. Company files must never be stored in personal cloud storage or personal email.

5. AI tools

Use only the approved enterprise AI tools listed on the intranet, including the Rahmqvist Assistant. Never paste confidential, client or personal data into public AI tools. You remain responsible for checking anything an AI tool produces before you use or share it.

6. Email and phishing

Report suspicious emails with the Report Phishing button in your mail client. IT will never ask for your password, by email, chat or phone. Never enter your credentials on a page you reached from a link in an email; go to the service directly instead.

7. Classifying information

Class	Examples	How to handle it
Public	Published marketing material	No restrictions
Internal	Policies, internal news	Share within Rahmqvist only
Confidential	Client documents, contracts, salaries	Need-to-know; encrypted when sent outside the company
Strictly confidential	M&A plans, security incidents	Named people only; never on paper outside the office

8. Lost or stolen devices

Report a lost or stolen laptop or phone to the IT Service Desk within one (1) hour of noticing - the desk is open around the clock. IT will lock and, if needed, wipe the device remotely. If it was stolen, also report the theft to the police within 24 hours and add the reference number to the ticket.

9. USB drives and removable media

USB storage devices are blocked on company laptops. Share files through company file storage instead. Keyboards, mice, headsets and screens work as normal.

10. Working in public places

Use a privacy screen on trains, planes and in cafés, and do not hold confidential calls where others can listen. Use your phone's hotspot rather than public Wi-Fi when you work with confidential information.

11. Personal use and monitoring

Limited personal use of company IT is allowed, as long as it does not affect your work, is legal and does not put company information at risk. For security, system logs are kept for 90 days and may be reviewed when investigating an incident. Breaking this policy may lead to disciplinary action.

Summary of the rules

Topic	Rule
MFA	Required everywhere
Password	At least 14 characters; no forced expiry; never reused
Screen lock	Automatic after 5 minutes
Updates	Within 7 days
Lost or stolen device	Report to IT within 1 hour; police report within 24 hours if stolen
USB storage	Blocked
AI tools	Approved tools only; no confidential data in public tools
Security logs	Kept for 90 days

Frequently asked questions

Q: I clicked a link in a phishing email. What should I do?
A: Disconnect from the network, then call the IT Service Desk straight away. If you entered your password, change it from another device. Reporting quickly matters far more than having clicked.

Q: Can I use ChatGPT for work?
A: Only approved enterprise AI tools may be used, and public AI tools must never receive confidential, client or personal data. Check the intranet for the approved list.

Q: I left my laptop on the train. Who do I call?
A: The IT Service Desk, within one hour - it is open 24/7. They will lock the laptop remotely.

Q: Can I copy files to my own USB stick?
A: No. USB storage is blocked on company laptops; use company file storage to share files.

Q: How often do I have to change my password?
A: Never on a schedule. Change it only if you think someone else may know it.

Q: Can my partner use my work laptop to check something quickly?
A: No. Company devices are for your use only.

12. Questions

Contact the IT Service Desk at servicedesk@rahmqvist.example, or on extension 4444 from any office phone.
